

The Secret to having hair that shines!

The best way to handle dull and lifeless hair is to shampoo and condition regularly. Weekly or every two weeks is recommended. Use and deep conditioning treatment once a month. A monthly steam treatment is one of the best to get your hair to give you the results you desire. Apply a small amount of shine serum with a few drops of oil to the entire head. Smooth in gently and style. Try LaRan's Finale Shine spray for that extra POP!

Also, you may want to use a Clear or colorful Cellophane. This coats the hair with a transparent color that will give your hair more body and adds an amazing shine. Cellophane's are also used to protect the hair from our harsh environment.

Your hair will just sparkle beautifully under lights. The Outdoor sunshine will bring out the glow that everyone will notice. The Ultimate is to have your hair shine like glass!
